

MOTOREN- UND
ENERGIE-TECHNIK

Meta Motoren- und Energie-Technik GmbH, founded in 1992 at the Technology Park Herzogenrath, is a company with its focus on Research & Development. Besides our emphasis on combustion engines and energy technologies our portfolio also contains hybrid technology and electromobility. The development of innovative technologies, engine components as well as whole engine families completes our wide range of work.

We are partners of the national and international automotive industry and energy sector. We offer broad experience and know-how as well as modern equipment to manage all development tasks – starting with concept studies right through to series release.

To strengthen our team we are looking for a Sales Engineer (m/f/d)

Your profile:

- engineering major, bachelor degree or above
- good sales skills
- good interpersonal communication skills
- more than 4 years of sales work experience, preferably work experience in powertrain R&D
- fluent in German and English

Your responsibilities:

- sales work for research and development business regarding engines, hybrids, software and electronic control
- test business sales for vehicles, hybrids, powertrains and engines
- sales work for prototyping business
- European market development
- responsible for project tracking, contact coordination, business negotiation, assistance in signing and executing contracts
- maintain good communication with customers, grasp customer needs in a timely manner, maintaining new and old customers

What we offer:

- an attractive and varied job in the field of future-oriented technologies
- exciting and challenging projects
- an innovative and growth-oriented working environment
- plenty of opportunities for independent work and versatile options of creating tasks
- a pleasant working atmosphere
- flexible working hours
- JobBike (tax-privileged „service bike“)
